Contracting Services

The company staff includes: Engineers, technicians craftsmen, supervisors, foremen, and workers. These highly skilled people have proven high reliability and technicality that contributed to the highest specification of output.

With offices through Iraq,-and within proven record, Dunia Al Jawda has built reputation for successfully undertaken high risk and technically difficult projects using our engineering skills. Our company structure allows us to study and execute all types of project with high efficiency, technique and capacity regardless of the size and project value. The fundamental strategy of Dunia Al Jawda focuses to meet and exceed client's requirement through innovation and team work.

1- Drinking Water treatment Plant & Sewage Water treatment Plant

The company's consistent focus on ecology, coupled with extensive research & development into reliability and new technology, have enabled it to far exceed all existing and proposed discharge consent standards enforced by the highest standard, and other regulatory authorities.

We have a strategic alliance with many specialize companies, which enables us to have access to a globally comprehensive, and technologically advanced, product range. Given the growth opportunity in the Iraqi market for water and wastewater treatment as well as the fact that the water and wastewater treatment business is highly specialized, we believe that we are on the cusp of rapid growth for this business

A) Our civil engineers can undertake the detailed design of the water supply system for your development, using computer aided design (CAD)we can provide cost effective solution,

Among the many advantages of design-build are:

- **Single source responsibility**
- **Total budget control**
- **Schedule Efficiency**
- **Flexibility to react to immediate design and construction issues and reduced overall project costs.**

Dunia Al Jawda design-build team will include the services of an architectural design team leader. Combining these various services under a single contract greatly increases project efficiency and value through lower cost and taster project delivery.

B) Dunia Al Jawda Electrical & Mechanical engineers are experienced in all aspects, including structural engineering. fluids and solids handling within the water industries.

Our electrical engineers are experienced in all aspects of electrical engineering employed within the water industries. They can provide electrical design, support and on-site commissioning services to our clients and to our in-house civil engineers.

C) Dunia Al Jawada Services offers a full consultancy service in the design and installation of control and equipment for water treatment processes.

D) Services have considerable experience of the automation, modernization, refurbishment and extension of existing treatment plants, while minimizing interruptions to the existing supply

Project References in water Sector

Various projects, mainly in the Industrial and Infrastructure sector, were studied and designed, for different clients, in the Middle East countries. Also tenders and construction analytical plans were prepared and executed.

At the same time, the company undertook and executed on EPC basis, for its own account, certain projects in Iraq, such as:

- The design, supply, erection, and commissioning of 200 units compact water treatment plants of more than 300m³/hr capacity each, installed within the country (Iraq).

2- Road and Buildings.

A) Commercial: Dunia Al Jawada team experience in commercial construction allows us to understand the client's unique needs.

We assist in determining the key design and construction elements that are vital in ensuring overall satisfaction with the completed project.

Our ability to provide cost competitive fast track

construction for high quality commercial buildings is evident in the projects that we have highlighted in this section.

B) Industrial: Dunia Al Jawada team of project managers, superintendents and project engineers provide the technical expertise necessary to understand the specific requirements of industrial facilities. Our team's extensive experience in building technically challenging facilities make Dunia Al Jawada, Contracting the logical choice in the industrial/manufacturing industry.

C) Road Construction: Our professional staff is dedicated to meeting the needs of our customers. We are trained in the latest industry standards and technology and use state of the art equipment. We are experienced in all phases in heavy construction, paving, developing a residential subdivision or constructing streets and highways, our experienced staff can handle the job from excavation to final surface.

Project Reference in Road Sector

- Road paving project executed inside and outside Erbil city.
- Road paving project executed inside and outside Baghdad and Ramadi cities

3- Power Transmission

Our engineers are particularly proficient in meeting all energy challenges while saving client expenditures, preserving the environment and conserving energy.

Each project is innovatively fabricated as the most practical solution that incorporates these principles.

Projects References in Power Sector.

- Project has been executed for extending the medium voltage grid through new distribution electricity lines, connecting Basra with some surrounding villages.

4- General Trading

Dunia Al Jawda General Trading, specializes in the physical sourcing and marketing of commodities for, government agencies, large corporations, and small and medium enterprises. Our goal is to provide Customers with carefully selected, high quality food products imported from reliable sources as well as best customer service.
